Press Release:

## **HIT II Thermal Break Anchoring System receives Architectural Record Product of the Year Award**

HALFEN USA's HIT-MVX insulated connection has been selected as one of Architectural Record's product of the year under the Facades category. A jury of six design professionals selected the best New Products of the Year out of hundreds of entries submitted to [Architectural Record's](#) annual competition. Entries were judged based on innovation, usefulness and aesthetics. HALFEN's HIT II system excels in all three of these categories with its sleek design and innovative compression shear bearings, while providing the most efficient structural thermal breaks for concrete to concrete connections.

The reception of this award emphasizes HALFEN's commitment to providing the highest quality of product while staying on the forefront of innovation.

The [HALFEN HIT II system](#) eliminates the adverse effects of thermal bridging typically associated with concrete balconies (mold growth, energy loss, cold floors). The HIT II system is the only structural thermal break with an ICC approval, ensuring quality and safety to designers. All standard units come with a 2-hour fire rating. HALFEN's HIT II system, moves us one step closer to an energy efficient world.

HALFEN USA is one of the leading companies in anchoring, reinforcement, mounting/framing and facade connection technology. We offer customers a vast range of products for applications in construction and industrial projects. The basis of our success is long-term partnerships with our customers and suppliers. The HALFEN name stands for quality, customer service and innovation. To learn more, visit our website [www.halfenusa.com](http://www.halfenusa.com).
